

Amendments to the Specification

Please replace the paragraph at page 9, line 8 with the following amended paragraph.

The display adapter 4 interfaces between the components within the syndicator 210 and the display [[4]] 14. The display adapter 4 converts data received from the components within the syndicator 210 into signals which are used by the display 14 to generate images for display.

Please replace the paragraph at page 12, line 1 with the following amended paragraph.

FIG. 3B illustrates another embodiment of a content distribution system. Specifically, the content distribution system 300 comprises the syndicator 210 shown in FIG. 2A, the proxy personal computer 320 shown in FIG. 3A, and a subscriber 260 in accordance with the instant invention. The proxy personal computer 320 is configured to receive the content 100 from and communicate with the syndicator 210. Further, the proxy personal computer ~~310~~ 320 is configured to transmit the content 100 received from the syndicator 210 to the subscriber 260.
